Reviews from users Irma Brenner: Excellent work adopting this classic for Android! Everything works as advertised, and still fun as ever. MODIT MODIT: Worked with gamepads at one time now it doesn't and the dev keeps pumping out new versions not paying any respect to the old version owners by re-applying gamepad control, support for bt gamepads including six axis controller/bt pads would go a long way. The game is wicked but no gamepads means owners who used it on tv boxes before can't since updates destroyed gamepad compatibility. You can pay someone with the sales you had for it to put it right could you not? Takes a few hrs I imagine? Abhay Soni: The game is good but there is not much reason to use a weak weapon when you get a stronger one. Well other than that why this game is not have any expansions ? The free version has more features then the paid version why ? Why don't we get map selection ? Why don't we have updated weapons selection ? I didn't want any ads or in game nonsense that's why I purchased this version and all I got was game which was completed in 1 hour and 10 minutes. Pavel Gallardo: I used to play this back in the Vista Hate days, and it still is the same game, great controls for touch screen but you have to tinker with them, just a short no-brain game thats really fun. Mohamed Magdy: Played it previously on my broken old laptop but never got to finish it this game is good mix the difficulty to the variety of enemies to the number of them you get Alien Shooter an absolutely badass alien shooting game I like the idea of facing an enormous horde of aliens by just yourself without any assist the game is perfect for such a price for an old game it's just amazing never thought I would play it on my own phone but here I am. Tree Munky: Great game, works well and is a lot of fun. The only issue is the auto aim feature can be a load clunky but nothing that stops you from playing. Stephan Beal: The first level was a blast, running around shooting non-stop at hordes of crawlies, but unfortunately the screen for buying upgrades after that is shrunk down illegibly small on my 10-inch tablet screen, so i can't sensibly progress. Adam S Prestage: Why does the character keep running in the direction of top right even when i am not touching the screen. If that is intentional then this is the worst game i have ever played. And i truly mean that it's not an overstatement. StormCmmdr: Got the play pass on a whim, and boy am I happy. Game have me a solid hour or so of fast paced alien massacre, and it was just what I needed. I hope there will be more soon, and maybe a new even more powerful weapon. One thing I disliked, the lil combat drone you can buy, is only one use, and seems to have too lil HP for end story. A Google user: Pretty fun game to play for how old this game is. It looks to be a port from the PC or game console platform. Whatever it is, it has the three criterias of being a good game: decent graphics, smooth gameplay with out lags, and decent controller for the touch screen.
